Bilateral Meetings

- Tuesday 12:30-13:30
- Tuesday 14.30-16.30.

Description

EXOR ETI Ltd. Belgrade is official representative and distributor of well known industrial automation and engineering software and hardware solutions. Some of the most important solutions that we can provide are:

- **zenon Software Platform** from Austrian company COPA-DATA GmbH is implemented as automation solution in many different industries in Serbia and the whole region, as energy management system, production line management system, building management system and many other specific solutions.
- **WSCAD** is a comprehensive ECAD software for electrical design and automation, now available in the latest ELECTRIX version with AI support. It covers all disciplines - from cabinet design to building automation - with access to a database of over 2.1 million parts. Faster, smarter, more efficient.
- **RealWear** - Hands-free Industrial Mobility devices are rugged, wearable computers designed for use in harsh industrial environments. They provide engineers with hands-free access to documentation, video calls, and SCADA screens. Ideal for maintenance, inspections, and fieldwork - safer, faster, and more efficient.
- many more other solutions that can be discussed during our meetings...
