Offer

Development of Complex ICT solutions (software development)

ComData is a Software Solution Provider founded in 1992. We are delivering custom-tailored ICT solutions, based on domain know-how and best practices, applying cutting edge technologies, including Scrum as one of the most popular frameworks of Agile development methodology.

8+ years we are working in D-A-CH region, offering cooperation on long-term or project bases, based on "dedicated team" with defined approach and fixed terms.

ComData have a large number of users, on domestic market and abroad. The users of our services have a wide range of activities, coming from different business sectors including Industry 4.0.

ComData develops different web, cloud or mobile applications with occasional and frequent visits to our foreign partners for further development and consultation on work on the project and domain know-how.

- We can offer ERP software to branches in Serbia, or modules that aren't covered in large ERPs (SAP) for Serbian market, such as HR module - (salaries, legal coverage, various modules that cover legislative and technical details for our country, etc.)
- Software that can read and control machines engaged in fields and production (eg. Bizerba scales that deliver weight information and print QR or bar codes for LOT tracing; avionics parts production and LOT tracing)
- Assistance and development of modules and improvements of your current software.
- Development of new software solutions based on Nearshoring model

Keywords: Software development, Programming, ICT, AI, IoT , IIoT, Industry 4.0, ISO 9001, ISO 27001, Nearshoring, Logistics, Custom made software solutions
