

Željko Pantić

Generalni direktor

Oyonway d.o.o.

Bilateral Meetings

- Tuesday 12:30-13:30

Description

We are engaged in the development, research and production of organic products produced from marine algae intended for animal nutrition, plant production and the revitalization of environmental pollution. All of our products are organic, harmless to animals, humans and the environment. They were obtained by special processing technology of valuable raw material brown sea algae *Ascophyllum nodosum*.
